San Jose City, Nueva Ecija, PH

<https://neo2724.github.io/JamesNeoCulala/>

PROFESSIONAL SUMMARY

Computer Science graduate with a passion for troubleshooting, efficient system support, and full-stack web development. Experienced in real-world tech solutions through freelance and internship work, including developing and deploying web-based systems. Strong interest in IT support, systems maintenance, and building user-friendly digital solutions.

EDUCATION

Bachelor of Science in Computer Science
Systems Technology Institute (STI College)

2021 - 2025

EXPERIENCE

Full Stack Developer Intern

Department of Science and Technology – PSTO, Nueva E Philippines | February 2025 – April 2025

<https://github.com/Neo2724/PSTO-DOST-Nueva-Ecija-Integrated-Program-and-Project-Management-System>

- Developed a Project & Document Management System for five government programs, streamlining tracking, uploads/downloads, and document status monitoring.
- Built responsive dashboards and user-friendly interfaces, improving navigation efficiency by 40% for non-technical users.
- Implemented advanced filtering, editing, and encoding features to simplify data handling and improve overall workflow accuracy.

Full-Stack Developer

STI – College San Jose Thesis Project | March 2024 – December 2024

<https://github.com/Neo2724/Web-based-reservation-system-for-Nelomax-Imagery-Studio>

- Independently developed a full-featured online reservation system for Nelomax Imagery Studio to replace manual, phone-based booking and eliminate scheduling conflicts.
- Designed and implemented modules for user registration/login, calendar-based appointment booking, automated reminders via email (using cronjob), feedback system, and an admin dashboard with business analytics and report generation.
- Demonstrated strong full-stack web development skills using HTML, CSS, JavaScript, PHP, MySQL, and cronjob for task automation, with a focus on usability, real-time data handling, and system efficiency.

Freelance Tech Support

Self-Employed, Philippines | February 2020 – Present

- Diagnosed and repaired hardware, software, and system issues on PCs and mobile devices.
- Provided one-on-one guidance to users on operating apps, mobile features, and basic computer tasks.
- Performed hardware replacements and upgrades (RAM, HDD, peripherals) to improve performance.
- Delivered system cleanups, backups, and software updates to ensure security and efficiency.
- Improved digital literacy by explaining technical concepts in simple, user-friendly language.

Customer support representative

Concentrix, Philippines | August 2025 – February 2026

- Provide customer assistance for a retail account through chat and email, ensuring low handling time, accurate, and good responses to inquiries and technical concerns.
- Utilize the agent desktop system to monitor and manage customer accounts, resolve issues, and maintain up-to-date records.
- Coordinate effectively with the team using Slack to ensure good communication and consistent service delivery.
- Demonstrate strong communication and problem-solving skills, offering clear explanations and efficient solutions to enhance customer satisfaction.
- Adapt quickly to process updates and service changes, including transitioning
